DETAILED ACTION

1. Claims 1-47 are presented for examination.
2. This Office Action is in response to the applicants' amendment received on August 1, 2007.
3. The applicants have not amended, cancelled, or added any new claims.
4. Applicants arguments with respect to claims 1-47 have been considered but are moot in view of the new grounds of rejection.

Claim Objections

5. Claims 1, 30, and 47 are objected to because of the following informalities: Independent claims 1, 30, and 47 are objected to because the limitations of these claims end with the limitations that recite a role of information being received and assigning the role of information. However, there are no limitations in the claims to provide support for the specific purpose of the role of information being received and assigned. The limitations do not include any specific significance of the claimed data and the manipulation of how the claimed data is used to produce a "real world result" (i.e., what the computer is doing), *Arrhythmia*, 958 F.2d at 1057, 22 USPQ at 1036. Also, the limitations do not include any transformation in the data that would ultimately produce a useful result, *AT & T*, 172 F.3d at 1358-59, 50 USPQ2d at 1452.

The Examiner kindly recommends that the applicants consider amending the limitations of claims 1, 30, and 47 to include the limitations of dependent claims 17 and

Art Unit: 2167

18 to overcome these claim objections. Dependent claims 17 and 18 include the claimed data manipulation and data transformation requirements needed to produce a useful result for the role of information being received and assigned.

Appropriate correction is required.

Thus, the remaining claims are dependent claims. These claims are also objected to for at least being dependent on the above objected to independent claims.
